

Managed Device

WORKPLACE AS A SERVICE – LEASE WHAT YOU NEED, PAY WHAT YOU USE.

Imagine well-managed and self-serviced workstations just within a few clicks. Imagine an easy and flexible leasing model to suit the needs of your company. Imagine access to your resources from anywhere with exactly the applications and software you need. Do not worry about updates. Get help with problems at any given time. Ensure highest security standards.

Certainly, you are booting your devices – your own or leased ones – and start working immediately. Managed Device is our leasing model-based service for providing hardware and software including 24/7 support and maintenance. What do you get? Exactly the equipment you need. What do you pay? Just what you use.

KEEP PACE WITH EVER-CHANGING CHALLENGES OF THE DIGITAL AGE

- More flexibility by using your own or leased hardware
- 24/7 support
- Equip your workstations with applications you need through Self Service
- Maximum scalability and individuality through arbitrary extension and customization
- Increased productivity with devices ready to be used
- Concentration on core business thanks to freed-up resources
- Highest security standards through identity-driven innovations
- Little capital lock-up with flexible leasing model

MAY IT BE EVEN MORE FLEXIBILITY?

Design your digital workspace exactly according to your needs. The flexible combination of hardware leasing, Microsoft Enterprise Mobility + Security and our Support Services let you work from anywhere you want, with the applications you need, on the device you love – as secure as possible.

THE HOUSING: HARDWARE LEASING

Design your workplace exactly according to your hardware needs – and make the most out of your business. **Optimization of business processes through flexible hardware packages:** Rely on maximum power while saving investment costs: leasing costs are planned and transparent. You pay per user and month. Increase your productivity. Optimize your workflows. **Leasing replaces purchase:** Always use the latest devices, rely on the most efficient hardware, for example, the Microsoft Surface including the programs you need for an IT infrastructure perfectly adjusted to your needs. Have all your familiar

tools and programs with you. Through fixed monthly installments and flexible contract terms, we guarantee cost transparency and predictability.

Your benefits

- IT complete package for lease and from one provider
- Most powerful hardware for experts
- Price per user and per month
- Individual, flexible and mobile
- Always up-to-date and secure

THE WATCHDOG: MICROSOFT ENTERPRISE MOBILITY + SECURITY

Microsoft EMS already detects dangers before they can cause damage. **Always one step ahead of digital threats:** Within a holistic security approach, company data is protected by comprehensive and identity-driven security techniques while at the same time ensuring the productivity of your employees – uncompromising, on any device and with the exactly needed applications. Our solutions are highly individual, flexible and intuitive.

Microsoft EMS provides you with tangible benefits within five specific areas.

- 1. Control identity and access in the cloud**
- 2. Get identity-driven security**
- 3. Manage mobile devices and apps**
- 4. Protect your information**
- 5. Virtualize your desktops**

THE INTERIOR: SUPPORT SERVICES

Support Services and Application Management make Managed Device that comfortable. Containing different service areas, you do not only get round-the-clock help with questions and incidents. Also, we take care of everything regarding your IT environment you don't want to worry about. Secondly, we help you to help

yourself with the Self Service: requests, individual applications. Finally, we provide you with everything you need to design your IT infrastructure highly individual: apps, software, custom-made packages. You need an application that does not exist yet? Our experts are looking forward to provide it.

TRANS4MATION – ...AND IT WORKS!

Designing the future – we succeed in doing so because we trust in our own ideas instead of copying foreign success recipes. With innovative products, solutions and services along the entire IT value chain, we ensure that our customers meet the challenges of the digital age. Whether IT Services, Application Development, Software or Project Management – we're looking forward to assisting you in all IT matters in Germany, Austria and Switzerland.
